FLUSH TECHNOLOGY

We offer a variety of innovative flush technologies to cater to your specific needs and preferences.

Our rimless design ensures a hygienic and easy-to-clean toilet bowl, while the washdown flush effectively rinses the entire surface area, preventing residue buildup.

Designed for efficiency, this flush option efficiently clears waste with a strong downward flow, ensuring a clean and odor-free bathroom experience.

Like any other part of your house, the bathroom can be made to look great and made to last long if it is taken care of regularly. To make your bathroom beautiful here are some invaluable tips.

Wash Basin :

A mild detergent can be used to wash the basin at least once a day. After washing, the basin should be wiped out clearly to avoid water stains.

Closets :

Cleanser like Harpic can be used to clear the closet with soft plastic brush, at least once a day.

To avoid minute discoloring, after flushing the toilet give it a once over with the soft brush.

Keep the toilet brush handy in a convenient stand nearby.

In case of toilets and basins, if there has been no maintenance since long period of time, water deposits and discoloration can form on the surface of areas that get wet. In such cases, these stains/marks can be removed
